Features and Benefits

Highest Immunity to False Alarms
The FDS301 consistently demonstrates the highest immunity to false alarms in areas where flare reflections and/or hot CO2 emissions may cause other technologies to false alarm.

No Sensitivity Loss
The FDS301 has been independently tested to show no sensitivity loss to a fire in the presence of modulated sunlight and modulated black body heat. This key feature means the unit has greater coverage than almost all other detectors in “real world” outdoor conditions.

On-board Recording of Alarms
The FDS301 incorporates a micro-SD card capable of recording a video of detected fires pre and post alarm. This recording is invaluable when carrying out an incident investigation and essentially by using the FDS301, there will never be an instance of an unknown alarm.

Live Video
Each unit has a live color video stream output; this can provide an invaluable source of information insight into the conditions in the area being protected.

- Intelligent visual flame detection (iVFD) principle ensures maximum false alarm immunity and eliminates sensitivity loss in the presence of modulated sunlight and black body heat.
- Operates with or without color video output.
- On-board recording of pre and post fire alarms
- Continuous optical test, without a reflector
  - Verifies operation and improves device up-time
- Microprocessor controlled heated optics
  - Maintains operation in harsh weather conditions (snow, ice, condensation)
- International hazardous area approvals
  - FM / ATEX / IEC Ex
- Certified performance testing to multiple fuels
  - FM 3260
  - EN 54-10
- Spatially aware—single sensitivity detection
- External testing with a long-range flame simulator
- Minimises the need for scaffolding
- Easy integration using industry standard outputs:
  - Alarm and Fault Relays
  - 0-20mA
  - HART®, as standard
- Certified SIL 2 capable
- Worldwide marine approvals
**Environmental**

Operating Temp: -76°F to +185°F (-60°C to +85°C)
Storage Temp: -76°F to +185°F (-60°C to +85°C)
Humidity: 0 to 95% RH non-condensing

**Operating Voltage**

24 Vdc Nominal - (Range 18 to 32 Vdc)

**Power Consumption**

6 W minimum (without heater), 15 W at 32 Vdc with heater on maximum

**Field of View**

90° horizontal by 65° vertical

**Speed of Response**

<7 seconds (Typical)

**Flame Sensitivity**
